

Diversified Risk Parity Portfolio

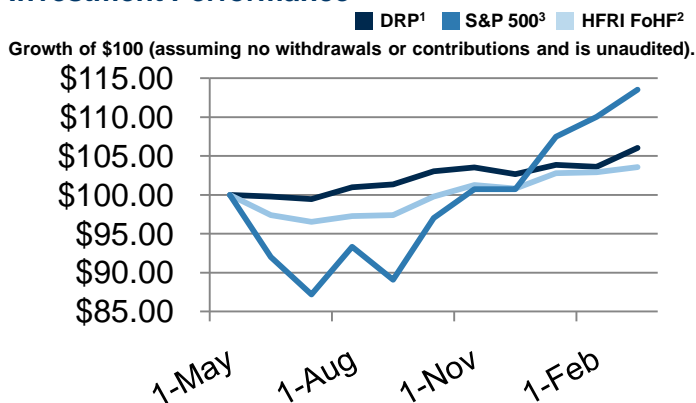

February-28-2011

Multi-strategy, multi-manager, diversified exposure to global financial markets

Investment Highlights

- » The DRP¹ strategy offers exposure to the alternative investment space with lower risk and less volatility than most traditional equity investment returns.
- » Over time, alternative investments have produced returns that are significantly less correlated to traditional investments. This is particularly beneficial in down markets.
- » The goal of the Diversified Risk Parity Portfolio is to seek to compound returns as frequently as possible.

Diversified Risk Parity Portfolio

February-28-2011

Manager's Commentary

They say that it is an uncomfortable state of mind when holding conflicting ideas at the same time. We have learned to appreciate and thrive in this state when it comes to investing as we would be hard pressed to remember a time when we weren't in a constant state of cognitive dissonance. At the moment, we are heartened by the positive trend in the hedge fund asset class as all major strategies experienced gains, we feel the global economy may well be in the early stages of what could be a multi-year growth cycle complimented by healing balance sheets and greater confidence in developed economies. Yet we continue to remain concerned about negative macro-economic forces endangering the post-crises global economic recovery. We are particularly focused on stressed European peripheral sovereign balance sheets, the potential drag on economic activity as a result of central banks exiting quantitative easing programs and sharply reduced fiscal stimulus, and commodity and food driven inflation in emerging markets.

Also, one could look at our monthly return streams as an example; monthly return streams are fungible and the last two months are good examples of that. We have had a long standing view that gold is highly correlated to sovereign balance sheet expansion (and/or contraction), and while that position has been a positive contributor to performance, it was a detractor in January. However, in February the metals complex in DRP staged a strong reversal as investors fled to safe haven assets. So while our theme is still very much in place and we are pleased with that position, we had to defend that position in January. We did so by using the weakness to add to the trade.

DRP was + 2.36% in February compared to 0.64% for the HFRI Fund of Funds Index. The out-performance was driven by strong performance in global trading with long positions in energy and commodities. Our hedged equity strategies performed well with a low beta profile as alpha generation continued to benefit from lower levels of stock correlation. As always, please do not hesitate to call with any questions. (512) 327-6000.

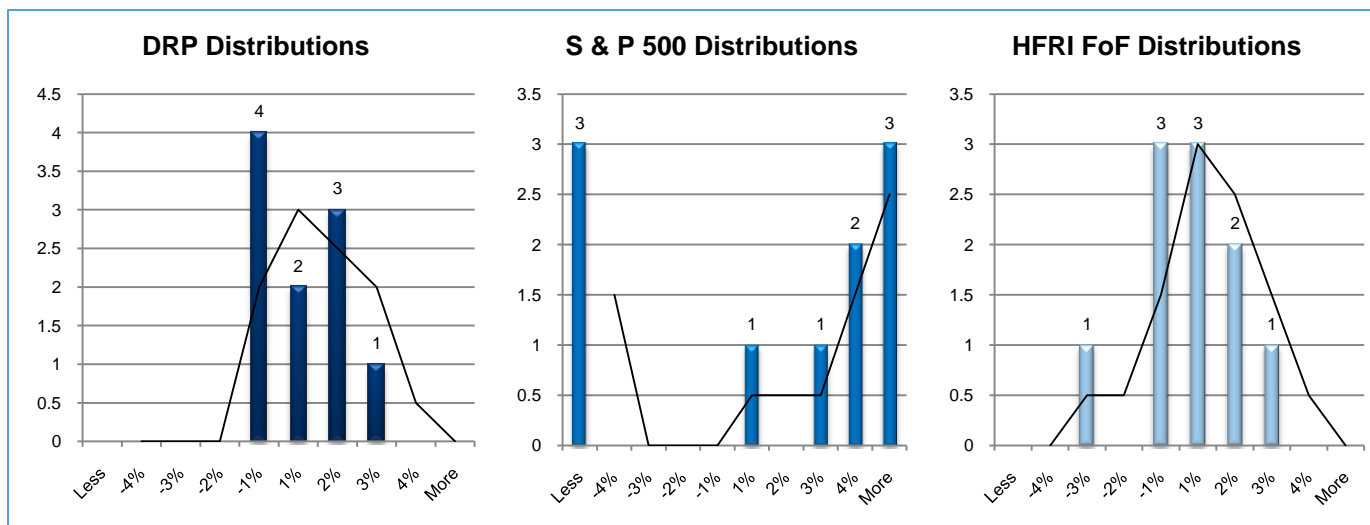

DRP Strategy Development

Diversified Risk Parity Portfolio, (DRP), ("the Fund") seeks to achieve superior risk adjusted returns by replicating the return streams found within a global hedge fund strategy. Within that framework DRP seeks risk factor neutrality within three major risk factors: Economic Growth, Inflation, and Risk.

In an effort to move the hedge fund allocation toward risk factor balance, we feel it is important to shift the risk exposure of the portfolio from those areas where the general hedge fund allocation creates an oversized exposure to certain economic factors. This risk can then be reallocated into those environments where the portfolio lacks material exposure.

For example, the HFRI Fund of Funds index's largest sensitivity is to rising growth and risk seeking environments with less protection during the opposite conditions or to rising inflation. In an effort to gain meaningful exposure to these factors, we believe that an investment in the Diversified Risk Parity Portfolio can make a material change in a portfolio's overall risk profile. In addition to providing a compelling risk reward profile, the Fund maintains a highly liquid portfolio, offering daily liquidity.

Return Distributions

Important Information

Past performance is not a guide to future results. Performance reflects the reinvestment of dividends, is net of portfolio-level fees/expenses but not sales charges which will reduce returns and reflects deduction of performance allocation as if payable monthly not quarterly. Performance may be volatile and the portfolio will fluctuate. Investors may not receive the full amount invested upon redemption. **Indexes** listed do not represent benchmarks for DRP, but allow for comparison of DRP's performance to an index. An investor cannot invest directly in an index. Index performance does not reflect fees and expenses. Investments are speculative and involve **Risk**. Portfolio risks include: dependence on the performance of underlying managers; DRP's ability to allocate assets; expenses at DRP and underlying fund; limited transparency with respect to the holdings in portfolio funds; and portfolio funds are generally not subject to any comprehensive regulatory scheme. Risks of underlying funds include, among others, leverage, options, derivatives, distressed securities, futures, and short sales, and investments in small, mid cap, fixed income, illiquid, emerging and developed market securities or specific sectors. Exchange rate fluctuations may affect returns. Allocations and holdings are subject to change. There is no assurance that DRP's investment objective will be attained. Incentive fees/allocation could encourage parties to make investments that are riskier or more speculative. This material is not an offer or a solicitation to subscribe for any Fund, and is not investment advice. Sales of shares are made on the basis of the offering circular only and cannot be offered in any jurisdiction in which such offer is not authorized. There is no secondary market for the investor's interest in DRP, liquidity may be limited and there are restrictions on transferring shares. Investment in DRP may not be suitable for all investors; investors should consider risks and other information in the offering circular and consult their professional advisers regarding suitability, legal, tax and economic consequences of an investment. Securities and advisory services offered through Centaurus Financial, Inc. a registered broker/dealer and a member FINRA and SIPC. This is not an offer to sell securities, which may be done only after proper delivery of a prospectus and client suitability is reviewed and determined.
