

Diversified Risk Parity Portfolio

June-30-2011

Multi-strategy, multi-manager, diversified exposure to global financial markets

Investment Highlights

- » The DRP¹ strategy offers exposure to the alternative investment space with lower risk and less volatility than most traditional equity investment returns.
- » Over time, alternative investments have produced returns that are significantly less correlated to traditional investments. This is particularly beneficial in down markets.
- » The goal of the Diversified Risk Parity Portfolio is to seek to compound returns as frequently as possible.

Diversified Risk Parity Portfolio

June-30-2011

Manager's Commentary

The equity market volatility index closed out June at 16.5 – a shockingly low number considering the S&P dropped 6% at mid-month. The European sovereign debt obligations weighed on all markets as commodities, bonds, and equities all ended the month lower. Our DRP Portfolio was -1.25% vs. the HFRI Fund of Hedge Funds Index being -1.36%. The relative outperformance came from our volatility cap and the global macro overlay we employ at the fund level.

The HFRI Fund of Hedge Fund Index suffered its largest loss since May 2010 and with negative contributions across all strategy areas. However, looking simply at the volatility index would truly understate the actual risk aversion that characterized markets for most of June. While performance in June was disappointing, due to the volatility cap we employ and the global macro overlay, we were able to achieve solid relative performance over our index and most of our less liquid competitors. We remained within our risk parameters and we continue to believe that the geopolitical and economic backdrop will continue to drive rich opportunity sets in the hedge fund asset class for the remainder of the year. As always, please do not hesitate to call with any questions. (512) 327-6000

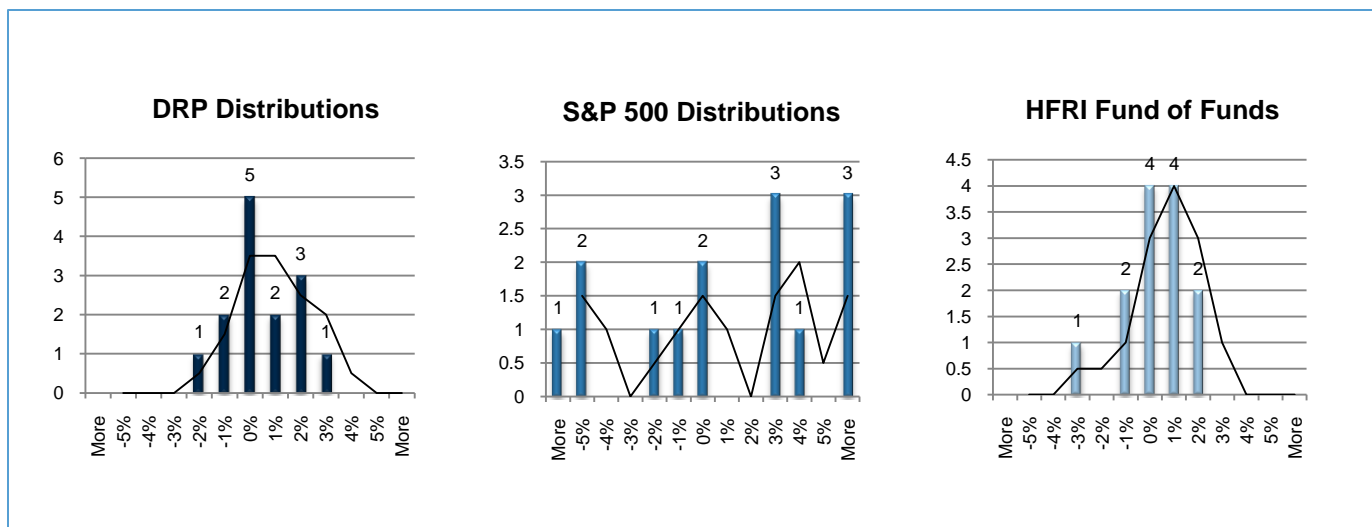

DRP Strategy Development

Diversified Risk Parity Portfolio, (DRP), ("the Fund") seeks to achieve superior risk adjusted returns by replicating the return streams found within a global hedge fund strategy. Within that framework DRP seeks risk factor neutrality within three major risk factors: Economic Growth, Inflation, and Risk.

In an effort to move the hedge fund allocation toward risk factor balance, we feel it is important to shift the risk exposure of the portfolio from those areas where the general hedge fund allocation creates an outsized exposure to certain economic factors. This risk can then be reallocated into those environments where the portfolio lacks material exposure.

For example, the HFRI Fund of Funds index's largest sensitivity is to rising growth and risk seeking environments with less protection during the opposite conditions or to rising inflation. In an effort to gain meaningful exposure to these factors, we believe that an investment in the Diversified Risk Parity Portfolio can make a material change in a portfolio's overall risk profile. In addition to providing a compelling risk reward profile, the Fund maintains a highly liquid portfolio, offering daily liquidity.

Return Distributions

Important Information

Past performance is not a guide to future results. Performance reflects the reinvestment of dividends, is net of portfolio-level fees/expenses but not sales charges which will reduce returns and reflects deduction of performance allocation as if payable monthly not quarterly. Performance may be volatile and the portfolio will fluctuate. Investors may not receive the full amount invested upon redemption. Indexes listed do not represent benchmarks for DRP, but allow for comparison of DRP's performance to an index. An investor cannot invest directly in an index. Index performance does not reflect fees and expenses. Investments are speculative and involve Risk. Portfolio risks include: dependence on the performance of underlying managers; DRP's ability to allocate assets; expenses at DRP and underlying fund; limited transparency with respect to the holdings in portfolio funds; and portfolio funds are generally not subject to any comprehensive regulatory scheme. Risks of underlying funds include, among others, leverage, options, derivatives, distressed securities, futures, and short sales, and investments in small, mid cap, fixed income, illiquid, emerging and developed market securities or specific sectors. Exchange rate fluctuations may affect returns. Allocations and holdings are subject to change. There is no assurance that DRP's investment objective will be attained. Incentive fees/allocations could encourage parties to make investments that are riskier or more speculative. This material is not an offer or a solicitation to subscribe for any Fund, and is not investment advice. Sales of shares are made on the basis of the offering circular only and cannot be offered in any jurisdiction in which such offer is not authorized. There is no secondary market for the investor's interest in DRP, liquidity may be limited and there are restrictions on transferring shares. Investment in DRP may not be suitable for all investors; investors should consider risks and other information in the offering circular and consult their professional advisers regarding suitability, legal, tax and economic consequences of an investment. Securities and advisory services offered through Centaurus Financial, Inc. a registered broker/dealer and a member FINRA and SIPC. This is not an offer to sell securities, which may be done only after proper delivery of a prospectus and client suitability is reviewed and determined.
